

Claudio Oleri Memorial

The Associazione Italiana Colore, with all its members would like to express its deepest condolences for the premature death of Claudio Oleri on 23 January 2018, together with all who have known him, read his books, listened to his conferences or lectures.

He was an Eminent physics scholar and an Associate Professor at the University of Parma, at the Department of Physics and Earth Sciences. He dedicated his life to the activities of teaching with the same passion and interest that he dedicated to the researches in the context of colour, applying physics to perception and fixing its role in colorimetry. Moreover in 1995 he started the Gruppo in Colorimetria e Reflectoscopia which later became the Associazione Italiana Colore.

His availability for colleagues and students and his ability to listen and advice are proverbial: his kindness will be always remembered by everyone who has known him.

These qualities are clearly demonstrated by the message of his profile at the University of Parma "My office is at the Department of Physics (Campus, viale Usberti 7/A), phone 0521-905214, email address: claudio.oleari@fis.unipr.it. You can send me email for any request or question related to my course. I'm almost always in my office and I'm always available except when otherwise busy. Just call to check if I'm busy. I always reply to emails."

He conducted within the Italian Association, a valuable activity of information and connection of which remains a rich bibliography, always having in mind the need to invest in research and training both in Italy and abroad.

His death leaves a void difficult to fill and the world of colour loses an intellectual and an attentive and informed scholar.
